Applepies

My name is Edward Schrijnemakers, Director of Applepies – The Global App Ecosystem.

We have revamped our website www.applepies.nl by the Team of G Star Infotech.

When we were thinking to revamp our website we fortunately came in contact with Rohit Bishen of G Star Infotech. Because we are based in The Netherlands and they are based in India we initially thought the distance and interpretation of the English language could be a problem. However they got my confidence by having good calls about the approach, service level and price in the beginning of the contract discussions.

Once started, we had a close and 24 hours cooperation with one contact person who coordinates the communication between us and their internal Team. We had a good insight about the progress and daily discussion about the lay-out of the website and the content. Because they are really flexible with respect to connectivity we finalized the website within 1 month.

In addition, we could see each change/amendment/follow up by getting a link of the new website. This ables us to monitor whether they took the right steps.

Key words: confident, good price, flexible, 24h connectivity (even with the time difference), and acceptable delivery time.

Guys, I really would like to thank you for all the work.

Best,

On behalf of the Team,

Edward

Director Applepies.
